

3D MEASUREMENT SOLUTIONS

BENEFITS OF USING OUR DIGITISING

ADVANCED STAINLESS
• ENGINEERING •

- Accurately record hand created templates and patterns for future production and conversion to CNC cutting data.
- Reverse engineer existing products to a high degree of accuracy.
- Record 3D information which removes the need to work to flash mouldings and templates.
- Receive on site attention from our digitising team and a quick turnaround of accurately processed CAD data.
- Record data from existing designs and products for archiving and reference.
- The hardware used is fully portable and battery powered, opening up endless opportunities of potential locations it can be employed.
- This service is not limited to the Marine Industry and could be used on anything from bulkheads to furniture.

3D MEASUREMENT SOLUTIONS

SERVICES OFFERED BY COONEY

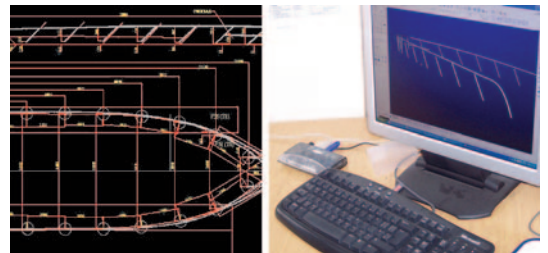

LEVEL 1. DIGITISE

Three dimensional data is recorded accurately and supplied in a format where the customer can manipulate the information for their own purposes.

LEVEL 2. DATA PROCESSING

Cooney Marine will offer a further service where the data collected by the digitising equipment is expertly faired and prepared for use. This involves converting the raw data into solid profiles and contours.

LEVEL 3. ENGINEER

The highest level of service offered will fair the data as Level 2 and then further manipulate it using sophisticated CAD systems to convert to useful information. Typical applications of the Level 3 service could be to create CNC programs or working drawings.

Please contact sales@cooneymarine.co.uk to discuss your requirements and arrange a quotation.
