YACHT STEERING WHEELS

A RANGE OF HIGH QUALITY STEERING WHEELS

- Whittall Marine Products, part of the Cooney Engineering Group, unveils a range of high quality Steering Wheels.
- Standard wheels come in five sizes from 600mm to 1000mm, each featuring five spokes and a 22mm diameter rim.
- Industry standard straight or tapered steering shaft, complete with cut key way offered on all types.
- Polished 316 Stainless Steel used throughout for a high quality finish.
- Monocoque design is used in the construction of the hub, insuring an incredibly strong wheel able to withstand the heaviest of impacts.
- Hand sewn suede covers can be supplied providing hand protection and extra grip. The UV treated suede will not bleed and is designed to blend with the teak deck.
- As members of the British Marine Federation we believe in UK manufacturing and skills.
- CE Tested and Approved.

Please contact Sales at Cooney Marine to discuss your requirements.
